

CURTIS LI

Senior Staff Software Engineer | Mobile Infrastructure & GraphQL Systems

New York, NY | curtis99877@gmail.com | linkedin.com/in/curtisli | curtis-li.com

EXPERIENCE

META PLATFORMS, INC | Senior Staff Software Engineer | New York, NY

2017–Present • Senior Staff (2024) • Staff (2022)

- Architected and implemented a new mobile GraphQL client adopted across Facebook, Instagram, Messenger, WhatsApp, and MetaAI, replacing a legacy client coupled to Facebook-specific infrastructure.
- Designed the client for dynamic server-driven queries, optimized memory layouts, full consistency, and GraphQL-agnostic adaptations, resolving fundamental incompatibilities between the legacy architecture and emerging product requirements.
- Owned the migration strategy, rollout, and organization-wide alignment, enabling new feature adoption, improving developer velocity and latency, and eliminating classes of reliability issues.
- Led a 30-person effort driving Instagram GraphQL adoption and migration from legacy REST infrastructure, enabling consolidation of backend servers and a more unified application platform.
- Mentored 4–5 engineers through sustained technical guidance and career sponsorship, helping engineers advance to Staff and Senior Staff levels.

NIMBLEDROID | Software Engineering Intern

May–Sep 2016

- Instrumented AOSP and Dalvik runtimes, improved static performance profiling through statistical modeling, and built Android QA applications.

NEW YORK UNIVERSITY | Systems Research Assistant

Sep 2015–May 2016

- Co-authored the Orochi web-verification paper; extended HHVM and MySQL instrumentation, contributed 2,000+ lines of C/C++, and restructured 100+ PHP bytecodes.

EDUCATION

NEW YORK UNIVERSITY | B.A., Computer Science; Economics minor | May 2017

Summa cum laude • Computer Science Prize for Outstanding Performance • University Honors Scholar

TECHNICAL SKILLS

Domains: Mobile infrastructure, GraphQL systems, client architecture, platform migrations

Languages & Frameworks: Java, Kotlin, Objective-C, Swift, C++, Rust, React, Python, JavaScript, Hack/PHP

Platforms & Tools: Android, iOS, Git, Linux
